# Many thanks to...

- Provita NGO
- Juan Carlos Amilibia, Project Analyst, Provita
- Rodrigo Lazo, Technical Coordinator, Provita
- Irene Zager, Director of Research, Provita
- Open source communities: Gridsome, Vue, Buefy, Bulma, MapLibre, Mapshaper, Mapbox, GDAL

*Thank you!*

# Pre-rendering with Gridsome

# Example: About.vue

```
<template>
  <Layout :bannerImage="bannerImage">
    <template slot="banner">
      {{ $t('label.about') }}
    </template>
    <div
      class="container site-text"
      v-html="$page.aboutData.text[$i18n.locale.substr(0, 2)]">
    </div>
  </Layout>
</template>

<page-query>
  query About {
    aboutData: aboutData (id: "about") {
      text {
        en
        es
      }
    }
  }
</page-query>
```

```
{
  use: '@gridsome/source-filesystem',
  options: {
    path: 'data/about.json',
    typeName: 'AboutData'
  }
}
```

gridsome.config
